

## Notes regarding the tactics of sabotage and terrorist acts (II)

### Special means of observation employed by the terrorists

Case : Counter-terror. Russian FSB

#### Background

The detentions were carried out in the course of anti-terrorist raid of 20 and 21-10-2015. According to police sources, among the detainees - three leaders of the terrorist organization Islamic State, including - Mohammed al-Haj, who is the commander of the cells in Chechnya. He was taken into custody after questioning. Two more arrested Mahmut Aslan T. and S., according to reports, were among the leaders of the Islamic State terror cells operating in Chechnya and Dagestan.

The houses of the suspects were surveilled for a very long time during which, while being carried out, the houses were searched.

Special means of observation were found, including laser sights. Certain of the detainees were recruiting fighters and frequently visited Syria.

Raids were carried out in the framework of investigation of the recent terrorist attack in Ankara, which killed 102 people. Regarding the involvement of the detainees in the attack information is current. Currently, nine people are preparing for deportation to Russia.
