Events Russian Federation

November 14 in the Moscow region, FSB officers detained 69 members of the international extremist organization Tablighi Jamaat. According to operational information, the cell was headed by people from Central Asia, but Russians were involved in its activities. This was the first time that the organisation has shown itself in the capital.

"The Federal Security Service of the Russian Federation together with the Russian Ministry of Internal Affairs, as a result of the events held on November 14, 2017 in the territory of the Moscow region, prevented the illegal activity of the deeply conspiratorial structure of the international extremist organization Tablighi Jamaat." - ORU .

It is noted that the leadership of the cell was carried out by people from the Central Asian region, and citizens of Russia were also involved in its activities. The department noted that the members of the group "took measures to conspire and counteract the law enforcement agencies."

"During the events, 69 members of the extremist association, including its leaders, were detained. During the searches, extremist literature, communications, and electronic media with reports on illegal activities were seized."

The members of the group probably conducted propaganda work among the Muslims. This assumption is confirmed by literature found in extremists.

* "Tablighi Jamaat" is an extremist organisation banned on the

territory of Russia by a decision of the Supreme Court of the Russian Federation of 07.05.2009.

** "The Party of Islamic Liberation" ("Hizb ut-Tahrir al-Islami") - the organization is recognised as terrorist by the decision of the Supreme Court of the Russian Federation of 14.02.2003.

*** "The Islamic State" - the organization is recognised as terrorist by decision of the Supreme Court of the Russian Federation of December 29, 2014.

FSB DETAINED TWO FIGHTERS READY FOR THE TERRORISM OF SEPTEMBER 1

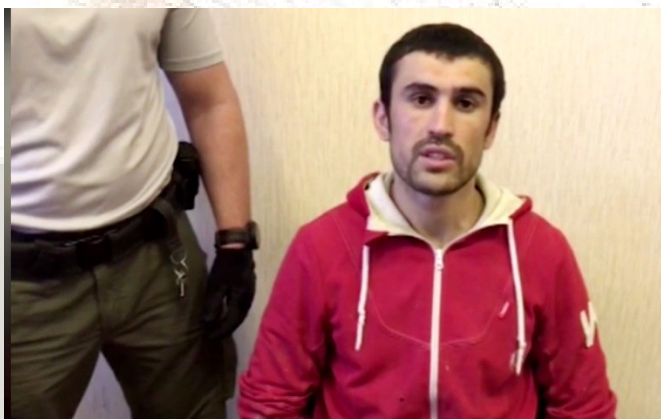

The Federal Security Service (FSB) on the territory of the city of Moscow and the Moscow region detected and suppressed the criminal activities of two immigrants from the Central Asian region who planned the commission of terrorist acts in places where people were massively detained on September 1 of this year. (see report)

One of the detainees on the eve of the Day of Knowledge, which this year coincides with one of the main Islamic holidays, Kurban Bayram, posted on the Internet his video message to members of the terrorist organization Islamic State, banned in the Russian Federation. In this appeal, he gave the so-called oath of allegiance to terrorists. After that, the newly minted member planned to attack civilians using 'cold steel'. In his phone, contacts with recruiters of this organisation and instructions on the planned crime were found.

At the place of residence of the second detainee, who is also a member of the Islamic State, an improvised explosive device of high power, objects and components used for its manufacture was found and seized. He admitted that he was going to become a suicide bomber and commit self-explosion.

The Investigation Department of the Federal Security Service of Russia is considering the issue of initiating criminal cases with qualifications for preparing for a terrorist act, participation in the activities of a terrorist organization, illegal trafficking in weapons, explosives and explosive devices.

The necessary investigative and operational measures are being carried out.

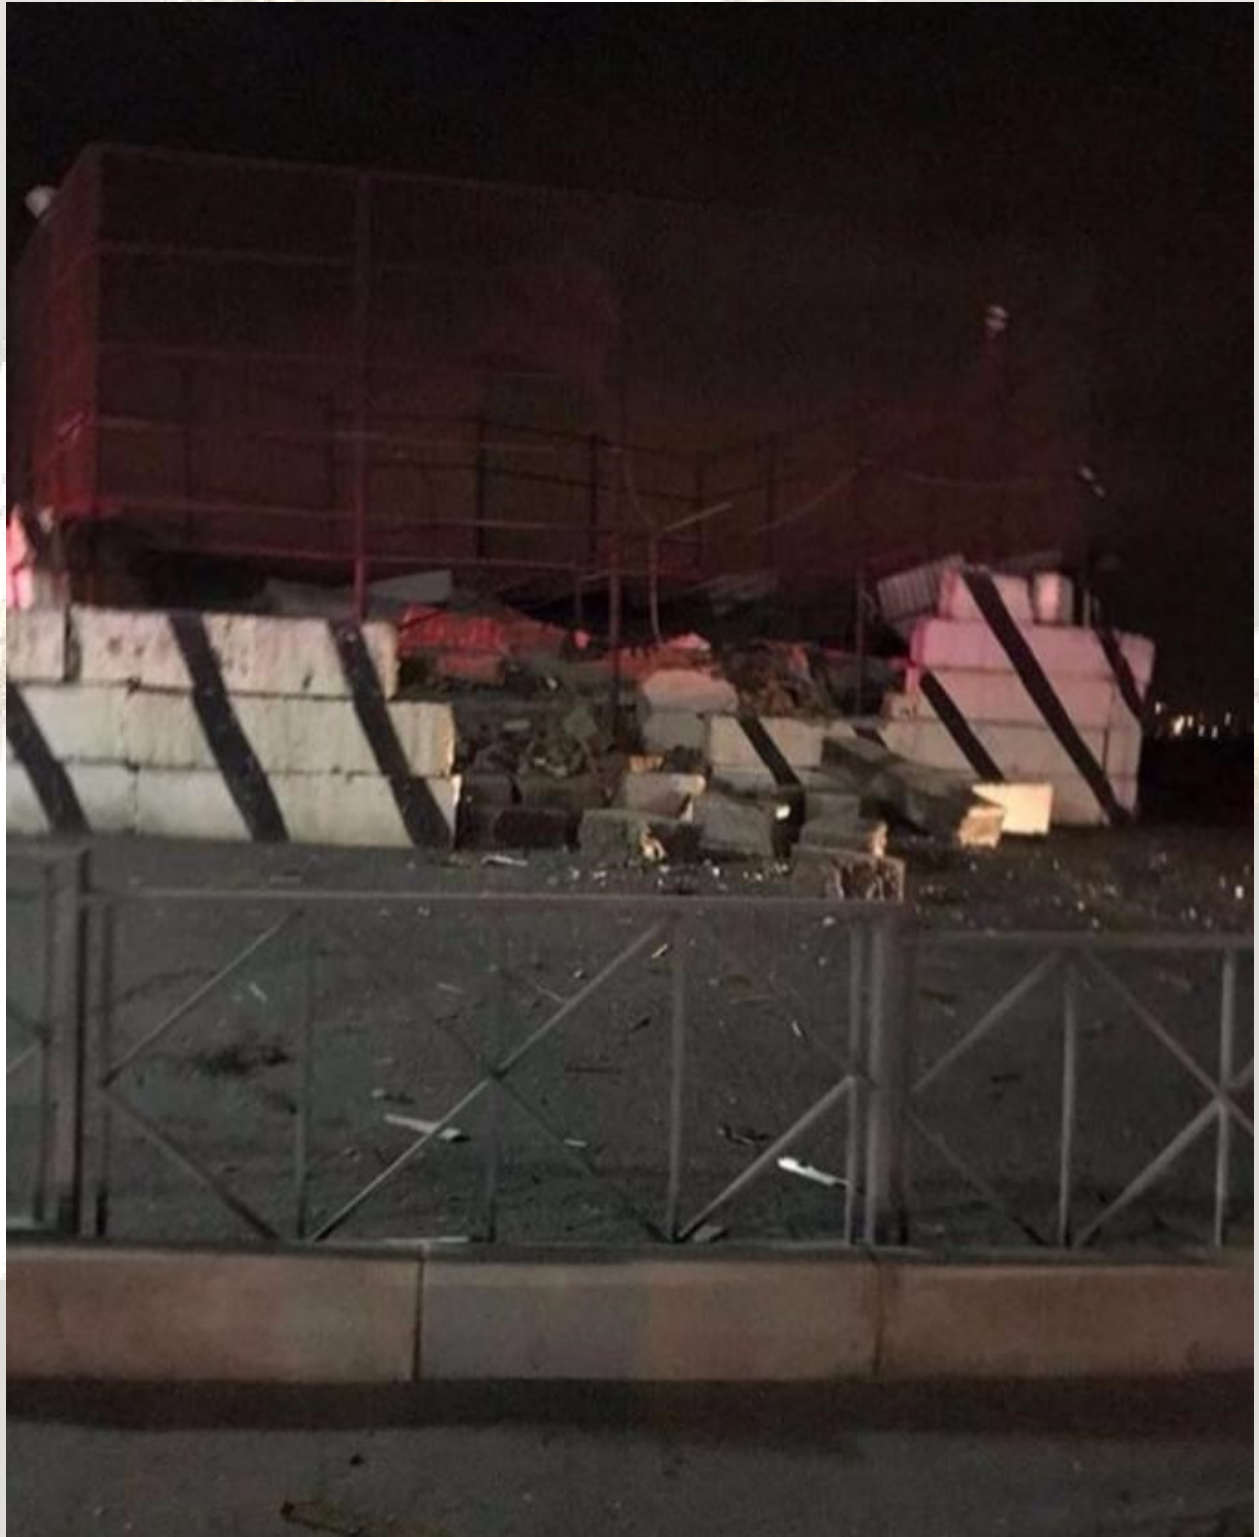

November 5 at about 18:00 person unknown drove a car at a checkpoint near the village of Yandare and opened fire on employees of traffic police. One of them committed a self-explosion on the territory of the DPS post.

When two suicide bombers self-exploded. One policeman died at once, the second in a grave condition, was taken to the intensive care unit, where, unfortunately, his life could not be saved. Three more people were injured.

The second attacker was blocked in a nearby building near the DPS post, where he was later 'destroyed'.

According to some reports, the attackers could have been four, allegedly, the two managed to leave. In Nazranovsky district introduced counter-terrorism operation mode - operational plans "siren" and "Edelweiss" to neutralise the criminals.

Unexploded IEDs were found in a black bag, apparently, rebel lay down before could press the detonator button. Regarding the explosives, the FSB are working.

Morning undermining in Makhachkala

On the 5th of the morning an explosion was heard in one of the buildings on Akushinsky Avenue in the city of Makhachkala. Arriving at the scene of the bombing, police officers found a lying dead body with multiple fragmentation-explosive wounds.

As it turned out, a young man was blown up in Akushinsky's house No. 34 on a grenade. Was also found a traumatic gun, as well as instruction manual.

When clarifying the circumstances of the incident it was established that the person came from the army and brought a grenade with him. In addition, his close relatives are also related to military service.

It seems that there was an accident with careless handling of a hand grenade. However, several questions remain to be clarified, in particular; where did he get the grenade and why did he need it, and also what did the said gentleman do with the characteristic beard and with the weapon not at the registration address?

These issues are now being investigated. However, it is already clear that there is no question of preparing a terrorist attack. However, for some reason the corpse was taken to the FME and has not yet been given to relatives.

Apparently forest bombers get blown up by their own mines or shoot each other through thoughtlessness. There was an article with the memoirs of a well-known bomber about how he, shooting at apostates from RPGs, got into his stupidity and tupory, he suffered a few days and "left for Allah." At the same time, the memoirist considered himself a benefactor, a sort of conductor of a virtual express train in Wahhabi paradise. No comment.

04.10.2017. at 20:35 during the ORM and the implementation of operational information within the framework of the KTO regime imposed by police officers on the 3 km of the Kachalai-Karaosek motorway in Babaurytovsky district, while trying to stop the VAZ-2110 vehicle without g / n (according to the traffic police The Ministry of Internal Affairs of the Republic of Dagestan for cars is represented by city A 330 KhN 05rus, attached to Kasumov Salavutdin Sadykovych, born in 1966, Buglen, Buinakskiy district), a person from the saloon of a car from a firearm of an unidentified sample produced shots in the direction of police officers.

As a result of shelling with gunshot wounds, 1 policeman was hospitalised.

In response, the criminals were killed and preliminarily identified as;
